

# GOODUSE MICRODESK

PRODUCTIVITY ENHANCING KEYBOARD ACCESSORY

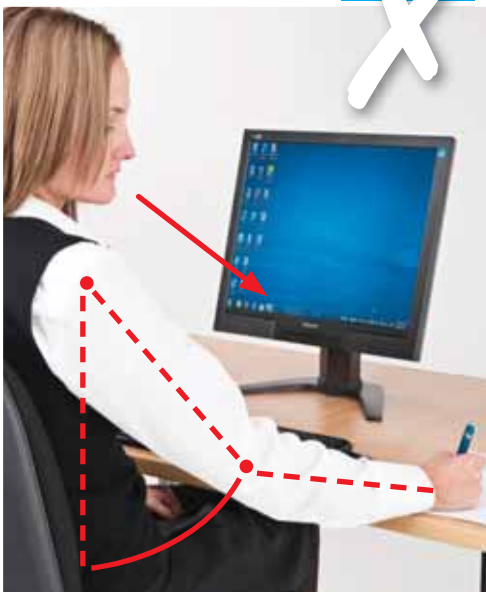

Despite the current trend towards digital communication and workplaces, paper seems to have a surprising longevity and resilience in the business world.

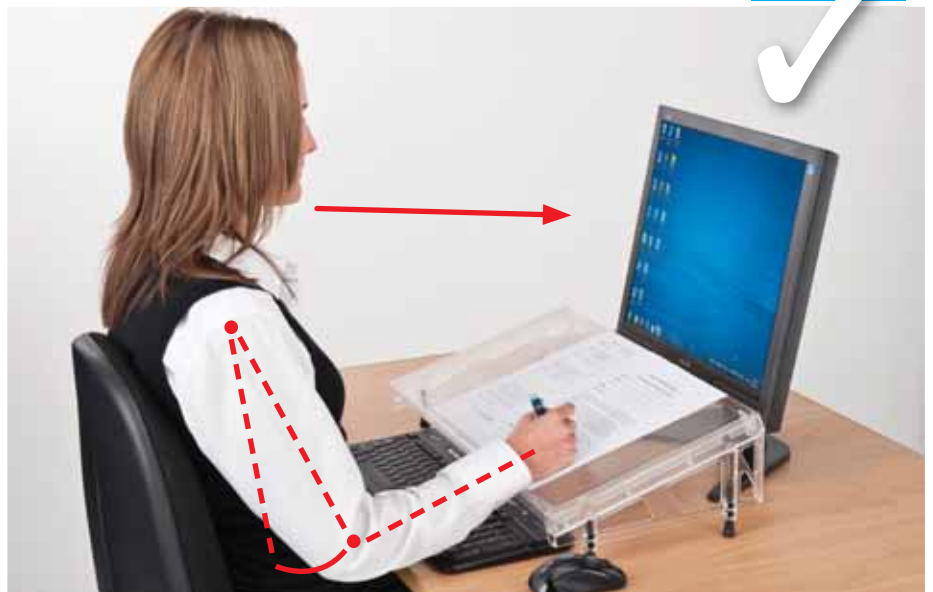

For most office workers the keyboard is their main content creation tool. However a comfortable and productive working area to store and write on paperwork is the second most important part of most computer workstations.

The **MICRODESK** provides an elevated adjustable writing surface in an ideal location, instantly adding valuable real estate to any desk. Users can transition between keyboarding, mousing and writing effortlessly without any need to reach/stretch/twist 'over' or 'around' their desktop just to interact with paperwork.

## POOR POSTURE

## SOLUTION

Shift your workstation into the 21st century with features that include:

- Ample easel size for any paperwork - 23" wide x 12" deep
- Adjustable height at front and back to achieve ideal slope
- Optional 'low profile' sides for keyboard drawers and articulating arms
- Two thicknesses of centrally positioned paper ledges which do not impede the forearm while writing

*Your mouse has an accessory - why not your keyboard?*
