

Pencllic Mini Keyboard™

Pencllic Mini Keyboard combines contemporary Scandinavian design, superior ergonomics and functionality without sacrificing comfort for size.

Pencllic's Mini Keyboard creates a healthy working position while working in front of the computer. The compact size allows for a more relaxed and centered working position. Not reaching for the computer accessories whilst working helps reduce RSI issues from occurring. It has an optimal 5 mm profile which decreases the strain on the wrists, while the mini keyboard is able to tilt slightly upwards to suit many different user needs.

Pencllic Mini Keyboard's comfortable Quiet-Touch keys minimises noise and provides good tactile feeling while you are working. Only small keystrokes are needed and minimal pressure is required when typing, creating a relaxed and efficient time in front of the computer.

Pencllic Mini Keyboard is stylish and attractive. The keyboard gives off minimal reflection, and usually matches the colour on your computer screen. This is a visual ergonomic improvement, implemented to enhance user experience. The contemporary design and relaxing colours make the keyboard as easy on your eyes as it is on your fingertips.

A little innovation – a lot smarter way of working!

- Mini size keyboard, 5 mm profile
- Quiet-Touch keys with reduced noise
- Short pressing distance keys with good tactile feeling
- Comfortable and relaxing colours makes the keyboard pleasant on your eyes
- Counteracts and reduces RSI problems
